

My wife and I are very concerned about the spread of LPFM stations and the possibility that they will take priority over current FM translator service. We listen to and financially support K-LOVE radio at 105.5 in the Phoenix area because they provide truthfull and positive news, encouraging messages and uplifting music. It would be highly disappointing to us if we could no longer get their signal because the FCC has allowed an LPFM station to broadcast over their signal. Please consider this type of ramification when you are making your decisions.

Thank you,

Dave and Joy Missler
